

Conductors

By far the largest and most important component of any earthing or structural lightning protection system is the actual conductor.

Furse offer a comprehensive range of copper and aluminium conductors in each of the main world standard formats, ie flat tape, solid circular and stranded.

Conductor colour chart

The choice of a lightning protection conductor is usually governed by its aesthetic impact on the structure to be protected. For many people the term lightning conductor conjures up an image of a bright green strip running down the spire of a church. This would clearly be unacceptable to the owner / architect of a modern structure.

In order to reduce the impact of an external system Furse offer a range of UV stabilised PVC covered tapes and solid circular conductors (only 10mm diameter) in colours chosen to match common building materials

Black	18B29*	
Green	BS 6746C	
Grey	00A07*	
Stone	08B23*	
White	10B15*	
Brown	06C39*	

* PVC colours to BS 5252

Conductor ratings

For below ground earthing applications Furse produce a large range of bare copper, tape and stranded conductors thus offering the designer of the system the correctly rated conductor without the need to oversize.

The following conductor ratings are based upon the recommendations of BS 7430 with an initial conductor temperature of 30°C and a maximum temperature of 250°C.

Conductor size	C.S.A. (mm ²)	kA for 1 sec	kA for 3 sec	Part no.	Conductor size	C.S.A. (mm ²)	kA for 1 sec	kA for 3 sec	Part no.
12.5 x 1.5mm	18.75	3.3	1.9	TC005	31 x 6mm	186	32.7	18.9	TC050

Tinned hard drawn bar

Conductor size	Weight per metre	Part no.
50 x 6mm	2.67kg	BA231

Supplied in maximum lengths of 3 metres hard drawn high conductivity copper bar to BS 2874-C101/C103.

Flexible copper braid

Suitable for earth bonding. Also supplied as standard pre-cut and drilled bonds.

High conductivity copper wire to BS 4109-C101.

Other sizes and types of braid can be made to order. Please telephone for details.
